ELAINE R. BOEHME
Secretary of the District

February 25, 2014

To Whom It May Concern:

This letter is in reference to my experience working with Platinum Pipeline, Inc. (PPI) over the past year. PPI was the prime contractor for our \$2.2 million Concord Landscape Recycled Water Project. This project installed nearly 12,000 feet of 4-inch to 14-inch recycled water pipeline across the Buchanan Field Golf Course (off the end of one of the runways for Buchanan Field Airport) and in city streets in a commercial district.

PPI was able to complete the project six months ahead of schedule by coordinating with the Airport, Golf Course, and the City of Concord to start work earlier in the morning than specified by the original encroachment permit while still maintaining a safe traffic flow, and by doing some work at night. Despite the accelerated schedule, PPI's quality of work remained outstanding.

Safety is very important to Central Contra Costa Sanitary District. PPI's work was always performed in a safe manner.

All issues involving public impact or constructability were handled in a timely manner that was mutually agreeable to all parties. PPI was also timely in all their paperwork, including initial project submittals, certified payrolls, and progress payment submittals. Technical submittals required few resubmittals, and the progress payment submittals were always accurate.

Platinum Pipeline, Inc. is a highly capable, efficient, and safe contractor whom I would recommend to work on any project.

If you have any questions, please contact me at (925) 229-7120.

Sincerely,

Michael Penny
Associate Engineer
